PETITION FOR EXTENSION OF TIME

WATER USERS:

Application Gasquet C. S.D. Permit A0 23513 / 016085

Water Code section 1396 requires an applicant to exercise due diligence in developing a water supply for beneficial use. The State Water Resources Control Board (SWRCB), in considering requests for extension of time, will review the facts presented to determine whether there is good cause for granting an extension of time to complete the project. Where diligence in completing the project is not fully substantiated, the SWRCB may set the matter for hearing to determine the facts upon which to base formal action relating to the permit. Formal action may involve:

Revoking the permit for failure to proceed with due diligence in completing the project.

Please check below the action you wish taken on this permit.

- 2. Issuing a license for the amount of water heretofore placed to beneficial use under the terms of the permit.
- 3. Granting a reasonable extension of time to complete construction work and/or full beneficial use of water.

The time previously allowed in your permit within which to complete construction work and/or use of water has either expired or will expire shortly.

_ []	The project has been abandoned and I request revocation of the permit.
 []	Signature Full use of water has been made, both as to amount and season, and I request license be issued.
	Signature
X Q	The project is not yet complete. I request the SWRCB's consideration of the following petition for an extension of time.
	PETITION FOR EXTENSION OF TIME If START of construction has been delayed
Com	plete items 1, 2, and 3.
1.	What has been done since permit was issued toward commencing construction?
2.	Estimate date construction work will begin.
3.	Reasons why construction work was not begun within the time allowed by the permit.

"The energy challenge facing California is real. Every Californian needs to take immediate action to reduce energy consumption.

For a list of simple ways you can reduce demands and cut your energy costs, see our web-site at: http://watertights.ca.gov."

Additional copies of this form and water right information can be obtained at www.waterrights.ca.gov.

Gasquet Community Service District

9. In the last 10 years we have added

Two raw water pumps in the Smith River (one 110 gpm and one 100 gpm)

Two additional boosters pumps (one 150 gpm and one 90 gpm)

Two 5,000-gallon chlorine contact tanks

Rebuilt the motor control center

Rebuilt the telemetry and pump control system

A 45 kW emergency generator

Changed our disinfection from chorine gas to sodium hypochlorite.

Prepared a site for a new storage tank

13. We have been adding to the plant and distribution system as funding has allowed. We are requesting State Revolving Funds for plant expansion and required additional storage. We have raised our Water Rates substantially over the past ten years and have saved enough money to start plant expansion or adding storage this year.

I believe that with these improvements Gasquet C.S.D. will be able to provide potable water to its customers for many years.

ENVIDONMENTAL INCODMATION

ENVIRONMENTAL INFORMATION FOR PETITIONS

☐ Petition for Change

Petition for Extension of Time

Before the State Water Resources Control Board (SWRCB) can approve a petition to change your water right permit or a petition for extension of time to complete use, the SWRCB must consider the information contained in an environmental document prepared in compliance with the California Environmental Quality Act (CEQA). This form is not a CEQA document. If a CEQA document has not yet been prepared, a determination must be made of who is responsible for its preparation. As the petitioner, you are responsible for all costs associated with the environmental evaluation and preparation of the required CEQA documents. Please answer the following questions to the best of your ability and submit any studies that have been conducted regarding the environmental evaluation of your project. If you need more space to completely answer the questions, please number and attach additional sheets.

DESCRIPTION OF PROPOSED CHANGES OR WORK REMAINING TO BE COMPLETED

ENVIRONMENTAL INFORMATION FOR PETITIONS

4.	EN a.	Have you contacted the California Department of Fish and Game concerning your project? YES \(\text{ NO}\) NO If YES, name and telephone number of contact: \(\text{ Jane Vol-pageL}\) \(\text{ 1-530-225-2124}\) VIRONMENTAL DOCUMENTS Has any California public agency prepared an environmental document for your project? \(\text{ YES NO}\) YES \(\text{ NO}\) If YES, submit a copy of the latest environmental document(s) prepared, including a copy of the notice of determination adopted by the California public agency. Public agency: If NO, check the appropriate box and explain below, if necessary: The petitioner is a California public agency and will be preparing the environmental document.* I expect that the SWRCB will be preparing the environmental document.** I expect that a California public agency other than the State Water Resources Control Board will be preparing the environmental document.*
		 See Attachment No. Note: When completed, submit a copy of the <u>final</u> environmental document (including notice of determination) or notice of exemption to the SWRCB, Division of Water Rights. Processing of your petition cannot proceed until these documents are submitted.
		** Note: CEQA requires that the SWRCB, as Lead Agency, prepare the environmental document. The information contained in the environmental document must be developed by the petitioner and at the petitioner's expense under the direction of the SWRCB, Division of Water Rights.
5.		Will your project, during construction or operation, (1) generate waste or wastewater containing such things as sewage, industrial chemicals, metals, or agricultural chemicals, or (2) cause erosion, turbidity or sedimentation? YES NO If YES, or you are unsure of your answer, explain below and contact your local Regional Water Quality Control Board for the following information (See instruction booklet for address and telephone no.):
		□ See Attachment No
		Will a waste discharge permit be required for your project? YES NO Person contacted: Tom Dunbat Date of contact: 3 - 14 - 05
	C.	What method of treatment and disposal will be used?
		□ See Attachment No
6.	a. b.	RCHEOLOGY Have any archeological reports been prepared on this project? YES NO Will you be preparing an archeological report to satisfy another public agency? YES NO Do you know of any archeological or historic sites located within the general project area? YES NO

	If YES, explain:
	See Attachment No
7.	ENVIRONMENTAL SETTING Attach three complete sets of color photographs, clearly dated and labeled, showing the vegetation that exists at the below-listed three locations. For time extension petitions, the photographs should document only those areas of the project that will be impacted during the requested extension period. Along the stream channel immediately downstream from the proposed point(s) of diversion. Along the stream channel immediately upstream from the proposed point(s) of diversion. At the place(s) where the water is to be used.
8.	CERTIFICATION I hereby certify that the statements I have furnished above and in the attachments are complete to the best of my ability and that the facts, statements, and information presented are true and correct to the best of my knowledge.
	Date: 3-18-05 Signature: Michael & Mogan

Attachment #1

Work already completed at Gasquet C.S.D. Include:
Four raw water pumps in the Smith River (350 gpm)
Water treatment capabilities of 150 gpm
Chlorine contact tanks
Four booster pumps (350 gpm)
Emergency generator
Water mains and fire hydrants
150,000-gallon water storage tank with area for an additional tank.

In the next ten years Gasquet C.S.D. plans to increase our water treatment capabilities to 350 gpm and add required storage. This will likely include:

Constructing a pole type building approximately 24x40 feet, 14 feet high at the peek. The site at the Plant is level and fenced, I expect very little ground work for a pole building. We will install a purchased "package water treatment plant" in the building.

No work needs to be done at the raw water site in the North Fork Smith River as we can now pump to our limit.

The tank site is already level for a water storage tank
